Message from the Chairman,

As Yıldız Holding and its associates, we are known not only for the success of our business and our contribution to the economy, but for our ethical reputation as well. As we have in the past, today we place a lot of importance on being known for our exceptional work ethics.

Hence, as we update our vision and mission, we have reviewed our ethical principles according to the needs of today and made them a part of the written culture of Yıldız Holding.

When we examine the ethical guidelines regulating our rules for working together as part of Yıldız Holding, despite many pages and headings, we can see that our behaviour and principles stem from essential human values.

The universal principle in this regard is to avoid behaviors towards others that one is not willing is to have exhibited towards herself or himself. After all, the essence of the matter is to listen to the voice of one’s conscience.

Although these ethical values constitute the basis of business, we have witnessed that the evolution of the global trade, change and diversify the time, technology and society as the traditional ways of conducting business. Even the fact that the Internet has come into our lives, comprises an example of why it is necessary to come up with new ethical statements, according to these new behavior patterns.

The ethical rules and operation principles of Yıldız Holding cover the universal work ethics principles of the 21st century, and they also refer to the founding philosophy and work ethics of our company, established in the 20th century.

Our work principles has been a source of great pride for long years. They were shaped in accordance with our ethical rules and play an important role in establishing an environment with sustainable trust and respect.

We should never consider the ethics governing our relations with our shareholders, consumers, employees and society separately from the work we do. On the contrary, we must remember that these are the rules that complete our work and support all of our goals and activities.

As it is emphasized in our commitment, we;
• Inspire trust by operating with respect for our people, society, the health & wellness of our consumers and the environment.
• Fulfill our corporate social responsibility obligations while acting according to the open communication and honesty principles.
• Ensure to provide a trustworthy workplace that respects human rights.

It is our sincere wish that this study, as a written expression of the ethical values, which comprise the basis of our corporate culture, provide guidance regarding the way we work.
